

MACOGA, SA Health, Safety, and Environment Policy

Health, Safety, and Environment Policy

Our aim

Ensuring the health, safety and security of our employees, and protecting the environment are fundamental priorities for MACOGA.

We uphold these values in the same way that we ensure the quality of our work: by implementing rigorous controls through every phase of our production processes.

Our people receive training on how to perform their jobs safely, properly and in compliance with safety and environmental regulations.

We believe safety at work and environmental responsibility goes beyond regulatory compliance. We continually strive to meet and where practicable exceed strict safety; health and environmental performance targets and we are committed to continuous improvement in all aspects of our operations.

All MACOGA employees are responsible for complying with this policy.

Approved by
Oscar Concheiro
General Manager
MACOGA, S.A.

Our commitments

Safety is the responsibility of every employee at MACOGA, and “zero incidents” is our foremost goal.

Comply with all applicable HSE laws, regulations and other obligations.

Support and implement a HSE Management System.

Minimise adverse impacts of our operations on the environment and community, including the prevention of pollution.

Identify and report hazards and risks and seek to eliminate them from our operations and activities.

Establish, monitor and report on measureable HSE targets, objectives and performance.

Discuss with our workers and those with whom we share HSE duties to identify hazards and improve safe work practices.

Provide enough resources, including supervision, training, instruction and information, to support all activities to ensure that HSE risks are well understood and mitigated.
